Information letter week 05-06 2021
Luleå tekniska universitet

Overall Campus

To keep you updated regarding what is happening in the area and have access to information even between these mailings, we recommend that you download the Mitt Campus app, where we regularly update with current information about things that may affect your everyday life. There is gathered information about the campus, about the buildings and contact information for our employees. In addition, you can easily create and follow your error report.

The pop-up office Akademiska Hus previously had in house B is now in Corona times digital. Every other Thursday you can chat or talk to us at 11.00-13.00 via Teamslänken below, the next opportunity is 11 February. Take the opportunity to ask your questions about, for example, the development of the campus or one of the ongoing projects, we hope to see you!

Outdoor environment

Intensive work has been going on ever since last week's heavy snowfall to take care of all the snow that has come. Entrances and emergency exits have been shoveled and now we have moved on to ensure that snow does not press against glass sections or facades and in addition, snow piles are being removed. All roofs have been inspected and are being shot according to the roofing plan.
Luleå Energi will carry out the work on the district heating line that runs between house A and Teknikens Hus. They will start with the joints that are at Teknikens Hus staff parking. The entire work will take about 2-3 weeks and restoration of surfaces is done in connection with the other work at Universitetsvägen. The work should not affect the traffic.

Rainbow avenue

Between House A and House D
The work of assembling a new transformer station at Laboratorievägen has been postponed and will be carried out during week 5. In connection with this, 9 parking spaces at car park D-house P1 will need to be used. The car parks in question are shown on the enclosed barrier map (the red box that is not filled in) and more information is provided to those concerned. The joint pit that existed towards Tekniktorget by the fountain is now filled.

Between House B and House E
Repair of a cable is carried out outside the walkway, the area is cordoned off.

The Milky Way
The walkway along Betahuset's façade will be closed for weeks 6–7 for installation of façade lighting.

Camilla Friberg
Marknadskoordinator
073-054 08 63
Hus A/α
Academic building maintenance and business adaptation in the A117 LKAB hall is complete, what remains are some of LTU’s installations of technology. The premises are expected to be taken into use at the beginning of February.

House B/β
Maintenance is in progress in boardroom B1309. We replace all general lighting and make business adaptations for new furnishings and technology.

A minor leakage of water has been discovered in the library in connection with last week's heavy snowstorm. The roof is now made free of snow and ice and a snow sail will be fitted to ensure that leakage can not occur on more occasions. A stair tower is mounted on the outside to access the roofs without having to disturb the business. There is no risk to the roof construction and the library is open as usual.

House C
Entrance C14 is now open for entry and exit, instead entrance C12 will be closed from week 5 and will only function as an emergency evacuation.

The corridor on level 2 towards Polstjärnan is still closed and from week 5 onwards, the corridor on level three will also be closed due to internal work. Disturbing noises can occur, mainly on level 2 and we apologize for the inconvenience this may cause.

The culvert from house F under Regnbågsallén to house C between entrance F11 and C12 is still closed.

House E
Investigation and measures of cold offices in corridor E280 are ongoing, the work will continue during week 5.

House F
At Tunga labb, work is underway within the barriers. A material tent is located outside house K where there used to be a container.

Replacement of ventilation filter takes place in the house during weeks 5–6.

House K
Work on the last stage is in progress.
