## Overall Campus

To keep you updated regarding what is happening in the area and have access to information even between these mailings, we recommend that you download the Mitt Campus app, where we regularly update with current information about things that may affect your everyday life. There is gathered information about the campus, about the buildings and contact information for our employees. In addition, you can easily create and follow your error report.

## Outdoor environment

Luleå Energi is working to restore the ground surfaces on the south side of house A, at Kideus Preschool. The work is in the final phase, they are now waiting for an answer when the asphalt can be manufactured and delivered.

The pump for the fountain on Tekniktorget is still being repaired, but hopefully it will be up and running again soon.

## Rainbow avenue

The entrance to the library and the Polar Research Secretariat is open via a passage from Universitetsvägen and Entrance B8 is open for access to house B via Rainbow avenue.

## House A/α

In house A, no work is currently in progress. Renovation measures in the A2400 corridor will begin approximately in connection with the start of the semester HT-21.

The scope of measures for the remaining parts of the A-house is presented to LTU, planning for implementation is carried out together between the project and LTU begins before the summer and will continue after the holidays.

The moisture ratio in the floor leveling compound in A3568 has fallen below the limit values and the work of completing the floor has resumed. The work is expected to be completed by midsummer.

After the holidays, work will resume in foyer A3. So far the wall has been erected and the filling and painting has been completed.

## House B/β

The work of replacing damaged material on the library roof continues according to plan. We do everything we can to keep the disruptions as low as possible and regret if certain aspects of the work are perceived as disruptive to the business. The project does what is possible for the measures on the roof to be completed before the start of the semester HT-21, even if that goal is quite offensive.

The work to repair damage to the outer wall in B192 towards Rainbow avenue is in full swing. The measures experienced some setbacks during week 22 when it was established that two glass sections had to be replaced. It is doubtful whether these will arrive before the holiday, but there is no risk that this will affect the availability of the auditorium from the welcome period in August.

Boassin, Personnel Room B161 and Stora Blå Hallen B183 have been returned to their respective operations. Preliminary scope and schedule starting in the autumn for measures are presented to LTU.

## House C

Work is going on as before in several places in the house at the same time. On the inside, intensive work is underway in stage 6 to have time to complete the light courtyard before school starts. The tilers are working on laying tiles in the corridors, including outside StiL, and soon the new reception will begin to take shape.
