Now brighter times are approaching, at least in terms of the season. Spring winter is fantastic and in the current circumstances there are no excuses to stay inside when we have such beautiful weather days.

Let’s hope that we can return to a more normal existence sooner than we expect, but it is still too early to relax according to the recognized expertise.

At the Campus area, ongoing construction work continues, and spring cleaning of outdoor environment will be carried out in the coming weeks.

**Coming/Ongoing activities w17-18**

**Overall Campus**
Previosly implemented adjustments of the business still apply. Meetings are held at a distance when possible and ongoing dialogue is conducted on a daily basis with suppliers and contractors to plan, parse and prevent disruptions.

What you will notice is that we are not as accessible in the buildings, but we are available by phone, mail or video meeting.

**Outdoor environment**
A lot of work is ongoing, mainly along Vintergatan south of Regnbåsgalleri. We apologize for the disturbance and appeal that everyone respects the barriers.

Spring cleaning of the Campus outdoor environment will be carried out if the weather does not say otherwise. Among other things, cleaning of parking lots will be carried out during week 17. Information regarding this will be channeled through the University's coordinating functions.

Tree felling will be carried out west of Wibergsgården during week 17.

**Regnbåsgalleri**
In the coming weeks, removal of surface layer along the Rainbow Hall between the A and D houses will continue. Passages are referred to alternative walkways, follow orange location signs. Removal of surface layers in the "courtyard" at the B-house has begun and will continue the coming weeks.

**A/α-house**
Repainting of doors in basements is carried out week 15-18.

**B/β-house**
Start of indoor environment investigation in the B-house, starting in the beta-house during week 17.

Adaptation of Café and study area B1102 is carried out. Completion of roof spot lighting in B203 is carried out.

**C-house**
Continued planning for maintenance work in switchgear in the C-house. The affected areas of Campus are House C, S-Pavilion and Polstjärnan. More information will be provided regularly to the affected businesses.

Groundwork will continue during week 17 and 18 for foundation and Water/Wastewater for the U and V pavilions.

**D-house**
Nothing to report.

**E-house**
Gas leakage testing will continue the coming weeks.

**F-house**
Gas leakage testing will continue the coming weeks.

Installation of stage 3 on the T-pavilion is ongoing until Friday 24/4. After the installation, work on façade completions and interior installation work continues. The waste room at entrance F16 remains closed and opens Monday 27/4. The project asks everyone to avoid traffic next to entrance F16 as far as possible during week 17.

**Students House**
Nothing to report.
